CONDENSED LIST OF SPECIALTIES FOR 1910

BLOCK OF FRUIT TREES AND BUSHES IN BUCHANAN NURSERY

This list gives only a few specialties we are offering for 1910. We grow all kinds of fruits, trees, shrubs and plants adapted to outdoor cultivation in the Canadian prairie provinces. If interested in any plants not given here, write for our complete catalog, free for the asking.

Nurseries located at St. Charles, a short distance out Portage Avenue from Winnipeg. Electric street cars from the city pass the property.

City Phone : Ft. Rouge 1203-R12

SPECIALTIES FOR 1910

The Great Perfection Currant Largest red currant grown. Introduced by us last year. Fruit of immense size and fine quality. The greatest new currant offered for many years. **50c.** each.

The Beauty Black Currant One of the new black currants originated by Dr. Saunders, of the Dominion Experimental Farms, Ottawa. We find this new currant vigorous, hardy, productive and good quality. **40c.** each ; **\$3.50** dozen.

2 Great New Raspberries We offer again this season the two famous new Minnesota red raspberries, the **Minnetonka Iron-clad** and the **King**. These two varieties combine extreme hardiness with large size and good quality, and mark a distinct advance in raspberry culture. The hardiest and best raspberries that have been introduced in many years. **30c.** each ; **\$2.50** dozen. Order early. Supply limited.

The Sunbeam Raspberry Originated by Prof. Hansen, of Dakota, by crossing the hardy wild raspberry with a large, cultivated variety. The result is a very strong, hardy plant and fruit of large size. Offered for the first time. **35c.** each ; **\$3.00** dozen.

2 Great New Strawberries The **Morella** is a new Manitoba variety originated at our nurseries. Large berries of fine quality. Vigorous plants. The **Dakota** is a cross between a large cultivated variety and the wild strawberry of Manitoba. Has the hardiness of the wild berry, with much larger fruit. Recommended for the severest locations where other varieties have failed. These two new varieties offered for the first time in Canada. **\$5.00** per 100 ; **\$3.00** per 50 ; **\$2.00** per 25 ; **\$1.50** per dozen.

Hippophae Berry

A bush fruit, native of Lapland and Northern Siberia. On account of extreme hardiness this fruit promises to be of value for our prairie provinces. Absolutely hardy. Very prolific fruiter.

This shrub is related to the Buffalo Berry, a native shrub, but the fruit is larger and of better quality and not half the trouble to pick. Express the juice like currants for jelly. Makes a rich syrup, of the consistency and something of the flavor of honey. **50c.** each.

Bush Cherry

A species of the Western or Rocky Mountain Bush Cherry, improved by cultivation and selection. We have been improving these cherries for years by careful selection. Fruit first-class for canning. The Farmer's

Advocate says of this fruit: "Last year a crop of cherries was raised at the Buchanan Nurseries which for size, flavor and hardiness and yield can scarcely be equalled in the best fruit-growing sections. Mr. Buchanan is to be complimented upon his success with his hardy cherry and the country will appreciate his efforts to give it a fruit that seems to be adapted to our soil and climate."

Large plants, **50c.** each ; **\$4.50** doz. In order to introduce these cherries we are offering small plants at **\$2.00** doz ; **\$6.00** for 50 ; **\$10.00** per 100. These cherries will stand considerable frost while in bloom without loss of crop. Secure 100 at this low price.

New Cross-Bred Apples

Dr. Wm. Saunders, director of the Experimental Farms, Ottawa, has originated a number of new cross-bred apples, by crossing the hardy **Pyrus Baccata** with some of the large standard apples. We have tested these new apples and find them quite hardy and abundant fruited. We have a limited number of these new cross-bred apples which we offer at **60c.** each while they last ; **\$6.00** doz. Selected trees, **75c.** each ; **\$7.00** doz. Our supply is too limited to list the different varieties, but will supply one of each variety where several trees are ordered.

Norway Poplar

This is a tree said to have been discovered growing in a Norwegian settlement in Minnesota, hence the name Norway. It is claimed to be the fastest growing tree that can be grown in the north. The tree has become so popular in that State that the nurseries have been unable to supply the demand. At our nurseries it has proved thoroughly hardy. We can supply a limited number of orders at **50c.** each ; **\$5.00** doz. trees 4 to 5 feet ; larger trees **75c.** each.

Tree Collection Nothing is more uninviting or cheerless than the home without trees. A few trees will add greatly to the value of the farm and improve the appearance of the place enormously. To encourage tree planting we make the following offer : We will supply 1000 trees, from five to ten different varieties, our own selection, every tree home grown, acclimated and thoroughly hardy, for **\$20.00**. Best varieties for the country. Early orders will get greatest variety of trees while they last.

Flowers for the Farm The hardy perennial kind, that grow up from the roots every year, are the best flowers for the farm. Least trouble to grow. Longest season of bloom. Finest varieties. Delight your wife and family by ordering a collection. 30 plants, our selection, best hardy varieties, all field grown. No greenhouse stock. **\$5.00**.

Small Fruit Collection If you wish to plant a variety of small fruits and do not know what sorts to select, try our **\$10.00** collection of small fruits, which includes strawberries, raspberries, gooseberries, currants, cherries, all the best varieties for this country. The quantity and quality of the stock will surprise you.

Seed Potatoes Our own growing. Best varieties. Write us for particulars and prices on quantities.

Express Prepaid on orders of **\$10.00** and upwards. Orders **forwarded** C.O.D. on receipt of 20 per cent. in advance.

Do not entrust orders for trees to unknown agents for Eastern or United States nurseries. 90 per cent. of such stock is worthless here, and prices charged are usually exorbitant. Order direct from a responsible home nursery and get stock tested here and known to be best adapted to the country. Our stock is grown specially for this climate, hence it is the best.

If you decide to place an order with us, send it in at once. Early orders get first attention when the spring rush comes. Orders are filled in rotation as received.
